## PRESS RELEASE

August 2007

IMMEDIATE RELEASE

### **Belltech by KW coilover suspension for 2002 to 2006 Chevrolet SSR**

Belltech announces their Belltech by KW coilover for the 2002 to 2006 Chevrolet SSR. The stainless steel constructed coilover replaces the factory front shocks and springs with a complete coil-over suspension solution. Stock rear shocks are replaced with Belltech by KW shock absorbers. Original bump-stops are replaced with Belltech OEM quality load absorbing bump-stops.

The Belltech by KW coilover for the SSR enables the owner to lower their vehicle 1"-2" on the front axle and 2" on the rear axle. Adjustable (and independent reacting) rebound and compression damping for both the front and rear suspension allows a personalized performance driving setup for those technically demanding drivers. Compression and rebound dampening adjustment is conducted in the low-speed range. The high-speed set-up, so decisive for driving comfort, has been pre-set by KW engineers.

Important characteristics such as safety, quality and performance are all taken into consideration with each Belltech by KW coilover design. Each vehicle application is specifically designed and engineered for a proper range of motion, min/max weight loads and min/max lowering. All these requirements are met while retaining it's performance handling characteristics. Each Belltech by KW coilover suspension is produced with unique stainless steel "inox-line" technology. The stainless steel construction internally and externally provides long term durability and corrosion resistance from the elements.

Part # 21020    MSRP\$1850.00
