PRESS RELEASE

July 2006

IMMEDIATE RELEASE

Belltech Coilover for 2004 - 2006 Chevrolet Colorado / GMC Canyon

Belltech now part of the KW automotive group, teams up with associate company KW suspensions. Belltech engineers collaborated with KW suspensions, an international leader in performance suspension systems. To develop a performance truck coilover suspension system for all non-torsion key 2wd 2004 – 2006 Colorado's / Canyon's.

Each application is specifically designed and engineered for a proper range of motion, min/max weight loads and min/max lowering. Important characteristics such as safety and quality are taken into consideration with each Belltech coilover design. These requirements are met while retaining it's performance handling characteristics.

The Belltech coilover for the Colorado / Canyon enables the owner to lower their vehicle 0-3 inches on the front axle and retains enough travel to handle maximum load and dynamic loads during driving. The Belltech coilover with it's preset dampening rates permits customized lowering of the suspension and creates an optimized balance of sportiness, comfort and safety.

Part #12001
