## PRESS RELEASE

July 2009  
IMMEDIATE RELEASE

### **Belltech Muscle Cars Handling Kit 68-72 Chevrolet Chevelle / Malibu Monte Carlo / El Camino**

Belltech Muscle Cars, announces their Handling Kit for 68-72 Chevrolet Chevelle/Malibu/Monte Carlo/El Camino. The Handling Kit includes springs, Street Performance shock absorbers and Anti-Sway bars.

Belltech's springs are offered in two height options. Stock height replacement and a 1" lowering spring for the front and rear (small block engine). Each coil is manufactured from chromium alloy steel and is hot wound, shot peened then powder coated to exact specifications to assure the proper ride height and ride quality.

Belltech "Street Performance" shock absorbers offers the customer an OEM replacement quality shock absorber with performance handling characteristics. The Street Performance shock absorber utilizes a 15mm piston rod, 35mm piston and 55mm shock body, this provides added control for spirited driving while retaining a great balance of performance and comfort.

The Belltech Muscle Car anti-sway bars replaces both front and rear stock anti-sway bars with larger diameter solid construction anti-sway bars. The result is a increasing in anti-sway bar force on the front axle and on the rear axle. Belltech Muscle Cars anti-sway bars are manufactured from cold formed solid steel and use swedged ends for their superior strength and reliability. All anti-sway bars include high grade mounting hardware, polyurethane bushings and are powder coated for a lasting finish.

Please see Belltech catalog or website for specific applications. [www.belltech.com](http://www.belltech.com)
