## PRESS RELEASE

January 2009

IMMEDIATE RELEASE

### **KW Variant 3 coilover suspension for 1990-2005 Acura NSX**

KW suspensions announces their Variant 3 stainless steel constructed coilover for the 1990-2005 Acura NSX.

The KW suspensions coilover for the Acura NSX enables the owner to lower their vehicle 20 to 50mm on the front axle and 25mm to 55mm on the rear axle. The coilover suspension retains enough travel to handle maximum load and dynamic loads during driving. Adjustable (and independent reacting) rebound and compression damping allows a truly individual performance driving setup for those technically demanding drivers. Compression dampening adjustment is conducted in the low-speed range, while the high-speed set-up, so decisive for driving comfort, has been pre-set by KW engineers.

Important characteristics such as safety, quality and performance are all taken into consideration with each KW coilover design. Each vehicle application is specifically designed and engineered for a proper range of motion, min/max weight loads and min/max lowering. All these requirements are met while retaining it's performance handling characteristics. Each KW coilover suspension is produced with unique stainless steel "inox-line" technology. The stainless steel construction internally and externally provides long term durability and corrosion resistance from the elements.

All KW coilovers pass stringent German TUV safety and quality testing standards. Each kit is sold TUV approved.

Part# 35250022  
MSRP \$2599.00
