## PRESS RELEASE

December 2007

IMMEDIATE RELEASE

### **KW coilover suspension Variant 3 for 2008 BMW M3**

KW suspensions announces their Variant 3 stainless steel constructed coil-over for the 2008 BMW M3.

The KW coilover suspension for the 2008 BMW M3 enables the owner to lower their vehicle 10-40mm on the front axle and 5-35mm on the rear axle and retains enough travel to handle maximum load and dynamic loads during driving. Variant 3 permits an even higher degree of customization to the suspension. Adjustable (and independent reacting) rebound and compression damping allows a truly individual performance driving setup for those technically demanding drivers. Compression dampening adjustment is conducted in the low-speed range, while the high-speed set-up, so decisive for driving comfort, has been pre set by KW engineers.

2008 BMW M3 models equipped with the optional Electronic Dampening Control (EDC) may utilize KW's code isolator unit. KW 's code isolator unit disarms the factory EDC while preventing unwelcome error codes to the factory ECU.

Important characteristics such as safety, quality and performance are all taken into consideration with each KW coilover design. Each vehicle application is specifically designed and engineered for a proper range of motion, min/max weight loads and min/max lowering. All these requirements are met while retaining it's performance handling characteristics. Each KW coilover suspension is produced with unique stainless steel "inox-line" technology. The stainless steel construction internally and externally provides long term durability and corrosion resistance from the elements.

All KW coilovers pass stringent German TUV safety and quality testing standards. Each kit is sold TUV approved.

Part # 35220067 KW 2008 BMW M3 V3 coilovers without EDC - \$2695.00 MSRP

Part # 35220057 KW 2008 BMW M3 V3 coilovers with EDC - \$3095.00 MSRP
