## PRESS RELEASE

November 2011

IMMEDIATE RELEASE

### **KW coilovers in 2 Variants for 2011+ Dodge Charger**

KW Suspensions announces their stainless steel constructed coil-overs for the 2011+ Dodge Charger available in a Variant 1 & Variant 2.

The KW Suspensions coilover for the 2011+ Charger enables the owner to lower their vehicle 1.2-2.6 inches on the front axle and 1.8-3.2 on the rear axle and retains enough travel to handle maximum load and dynamic loads during driving. Variant 1 with its preset dampening rates permits customized lowering of the suspension and creates an optimized balance of performance, comfort and safety. Variant 2 is the ideal system for sporty drivers, who also wish to make modifications in ride height and rebound dampening. Drivers are able to adapt the suspension to their driving style.

All KW coilovers pass stringent German TUV safety & quality testing standards.

KW automotive North America, Inc. is the distribution base for KW automotive, GmbH, a manufacturer and distributor of KW Suspensions performance coilover systems. Also home to sport truck lowering component manufacture Belltech Sport Trucks and ST Suspensions.

Part # 10227019 - KW Variant 1 - MSRP \$1589.99

Part # 15227019 - KW Variant 2 - MSRP \$1899.99
