PRESS RELEASE

November, 2008

IMMEDIATE RELEASE

KW Clubsport coilover suspension for Nissan GTR

KW suspensions announces their Clubsport coilover for the Nissan GTR.

The KW Clubsport has been developed for the enthusiast who requires a more aggressive setup for racetrack events with mild street use. The Clubsport are outfitted with high quality racing top mounts, increased spring rates, tuned valving and large diameter piston rods. All applications feature adjustable (and independent reacting) rebound and compression damping for a personalized performance driving setup. The Nissan GTR KW Clubsport kit lowers the vehicle 10-30mm on the front axles and 15-35mm on the rear axles.

Important characteristics such as quality and performance are all taken into consideration with each KW coilover design. Each vehicle application is specifically designed and engineered for a proper range of motion, min/max weight loads and min/max lowering. All these requirements are met while retaining it's performance handling characteristics. Each KW coilover suspension is produced with unique stainless steel "inox-line" technology. The stainless steel construction internally and externally provides long term durability and corrosion resistance from the elements.

Part # 35285706
MSRP \$4395.00
