PRESS RELEASE

APRIL 2012

IMMEDIATE RELEASE

KW Variant 3 coilover suspension for 2012 Scion FR-S & Subaru BR-Z

KW Suspensions announce their Variant 3 stainless steel constructed coilover for the 2012 Scion FR-S & Subaru BR-Z.

The KW Suspensions coilover for the 2012 Scion FR-S & Subaru BR-Z enables the owner to lower their vehicle 20-50mm on the front axles and 20-50mm on the rear axles and retains enough travel to handle maximum load and dynamic loads during driving. Adjustable (and independent reacting) rebound and compression damping allows a truly individual performance driving setup for those technically demanding drivers. Compression dampening adjustment conducted in the low-speed range, while KW engineers set-up the high-speed pre-set, so decisive for driving comfort.

Taken into consideration with each KW coilover design are important characteristics such as quality and performance. We specifically design and engineer each vehicle application for the proper range of motion, min/max weight loads and min/max lowering. KW maintains all these requirements while retaining its performance handling characteristics. The stainless steel construction internally and externally provides long-term durability and corrosion resistance from the elements. All KW Variant 3 coilovers come with a limited lifetime warranty.

All KW coilovers pass stringent German TUV safety and quality testing standards. Each kit sold TUV approved.

Part # 35258004 MSRP: \$2,499.99
