PRESS RELEASE

April 2007

IMMEDIATE RELEASE

ST suspensions coilover for 2005+ Ford Mustang

ST suspensions (formerly Suspension Techniques), announces their performance coilover for 2005+ Ford Mustang (V6 & V8 models).

The ST suspensions coilover for the 2005+ Ford Mustang enables the owner to lower their vehicle 1.2 - 2.3 inches on the front axle and 1.4 - 2.1 inches on the rear axle and retains enough travel to handle maximum load and dynamic loads while driving. ST suspensions coilover with its preset dampening rates permits customized lowering of the suspension and creates an optimized balance of sportiness, comfort and safety

Important characteristics such as safety, quality and performance are all taken into consideration with each ST suspensions coilover design. Each vehicle application is specifically designed and engineered for a proper range of motion, min/max weight loads and min/max lowering. All these requirements are met while retaining its performance handling characteristics. Each ST suspensions coilover is constructed of corrosion resistant zinc plated threaded strut housings.

All ST suspensions coilovers pass stringent German TUV safety and quality testing standards. Each kit is TUV approved.

Part No.
V6 - 90323
V8 - 90323
