

LOWERING, LEVELING & LIFTING STRUTS

The most efficient & flexible way to lower, level or raise the front end of new generation trucks & SUV's

THE STRUT THAT DOES IT ALL!!!

IT LOWERS!

The Lift / Lower Strut enables you to lower your vehicle -2" in 1/2" increments (-3" for select applications), combine this with a shackle kit to provide you a lowered and level appearance. Or match it with a flip kit for that more aggressive lowered stance.

IT LIFTS AND LEVELS!

The strut enables you to lift the front end of your vehicle +2" in 1/2" increments (+1" for select applications)

STOCK HEIGHT REPLACEMENT STRUT!

Use it as a replacement strut at stock height. The strut provides better handling characteristics at maximum comfort – the perfect compliment to larger wheel and tire package for that added control

COST SAVINGS!

With an MSRP range of \$119.00 to \$139.00, it is a minimum of \$40.00 less than OEM type replacement struts

+2" to -3" *
 Range of Adjustment

-3" of lowering on select applications. See application list for details
